

Paywire Epic Reader Interface
Installation Guide for Kiosk
V1.12.2

2017/08/25

System Requirement

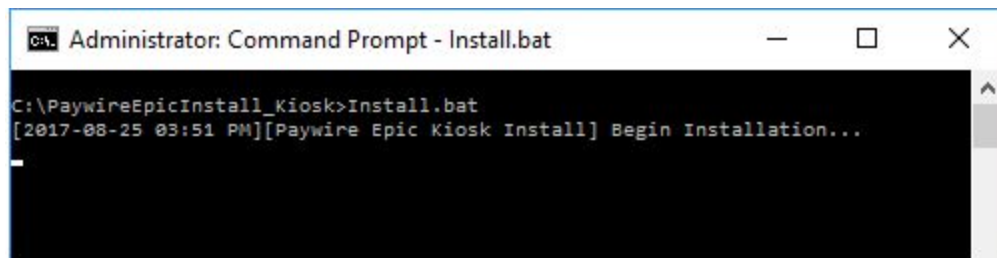

- Windows Server 2008R2 64bit
- Microsoft .NET Framework 4.5
- Visual C++ Redistributable for Visual Studio 2015

Attention

- Please use Command Prompt (Admin) and go to the installer directory run the Install.bat (or Installx86.bat for the 32-bit machine) , installation result will show up by using this method.
- You can also right click and run the Install.bat (or Installx86.bat for the 32-bit machine) as Administrator, this won't show up any result text.
- Never double click the .msi installer file, this will cause an incomplete install.

Kiosk Install

- Find the kiosk **Install.bat** file, right click and **run as administrator**. This process could take up to a minute to complete. The Paywire applications will be automatically installed to C:\Program Files(x86)\Epic\v8.3\Welcome\plugins\ and the necessary ocx will be registered.
- After install, the Epic software should be configured to use the card reader, these parameters will be needed for Epic configuration, Please see **Paywire Epic Kiosk Configuration Guide V1.12** for detail.

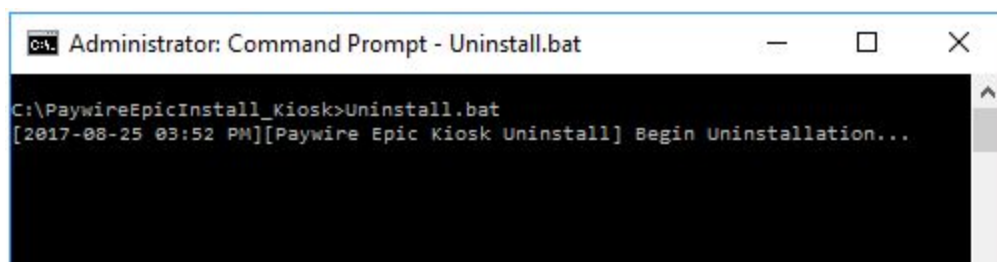

The screenshot shows a Windows Command Prompt window titled "Administrator: Command Prompt - Install.bat". The command prompt shows the directory "C:\PaywireEpicInstall_Kiosk" and the command "Install.bat" has been executed. The output text is "[2017-08-25 03:51 PM][Paywire Epic Kiosk Install] Begin Installation..." followed by a single line of dashes.

```
C:\PaywireEpicInstall_Kiosk>Install.bat
[2017-08-25 03:51 PM][Paywire Epic Kiosk Install] Begin Installation...
-
```

Kiosk Uninstall

- Find Kiosk **Uninstall.bat** file, right click and **run as administrator**. The ocx will be unregistered and the applications will be removed.

The screenshot shows a Windows Command Prompt window titled "Administrator: Command Prompt - Uninstall.bat". The command prompt shows the directory "C:\PaywireEpicInstall_Kiosk" and the command "Uninstall.bat" has been executed.
